

Internship Project Manager

About Bridge the Gap

Bridge the Gap is an innovation consultancy company that supports deep-tech start-ups to overcome the challenges they meet in the journey to market.

We provide our clients with the following services.

- Public funds through European Programs. We prepare outstanding proposals for competitive calls such as EIC Accelerator, EIC Transition, EIC Pathfinder, Eurostars and Financial Support to Third Parties (FSTP).
- Private capital rounds. We prepare data room and facilitate the match with investors.
- Business creation and market validation. We carry out acceleration activities to support spin-off and start-up creation in the early stages, including hands-on development of technology roadmap, business model, commercialisation strategy and financial plan.

What are we looking for?

A person who wants to learn about project management and cutting-edge science and technology innovation. The internship will be mainly focused on project management (financial and technical) of funded projects under the European Funding schemes such as EIC Accelerator, Eurostars and EIT Health. Other activities related to proposal writing, start-up scouting and programme search will be included. The candidate will develop the following activities:

- Financial control of funded projects under the mentioned schemes.
- Follow-up of the work plan, including activities, deliverables and milestones.
- Managing the application and reporting portals (Funding & Tenders, Sede-CDTI).
- Writing reports.
- Scouting start-ups of deep-tech technologies.
- Identify public funding schemes suitable to apply for our clients.
- Writing part of proposal applications.

What requirements do you have to meet?

- 3rd year of Undergraduate Studies of Economics and Business (Business Management and Administration, Economics, Industrial Technologies and Economics Analysis).
- High proficiency in English.
- Strong analytical and well-organised skills.
- Communication skills.
- Customer-oriented approach.
- Eagerness to learn cutting-edge innovations in science and technology.

What will you get as a member of the Bridge the Gap team?

You will expand your practical knowledge of technical and financial project management. You will learn about innovation and entrepreneurship. You will work closely with European deep-tech champions, learning from their high-impact and high-growth technology businesses in healthcare, artificial intelligence, low-carbon energy, hydrogen, nanomaterials, photonics or the construction industry. We offer:

- Internship contract and remuneration.
- Flexible working time in a hybrid model (in-person in Barcelona offices and remote).
- Opportunity to join the team after completing your Bachelor's Degree.
